

RECAP IQ DEVELOPMENT OPTIMIZER

HOW DO I FIND A COMPANY'S PIPELINE?

USE CASE

I'm looking for companies which have strong pipelines in the area of oncology to find potential partners to license one of our drugs.

HOW TO CONSTRUCT

Go to Graph > Pipeline and construct your search (Compare: "Recap Bioportfolio"; Options to Compare: "Top 10"; Therapeutic Area: "Oncology (All)"). Then click "Update Graph".

The screenshot shows the 'Search Builder' interface for the RECAP IQ DEVELOPMENT OPTIMIZER. At the top right, there are two buttons: 'Save Graph' (blue) and 'Update Graph' (yellow). Below these are two tabs: 'Search Builder' (active) and 'List of Records'. The main search area is divided into several sections:

- Compare (vertical axis):** A dropdown menu set to 'Recap Bioportfolio'.
- Options to Compare:** Two radio buttons: 'Top 10' (selected) and 'Custom (10 max)'. A dropdown menu is next to the 'Custom' option.
- Compare to all others:** A checkbox that is currently unchecked.
- Recap Bioportfolio (Company):** A dropdown menu set to 'All'.
- Therapeutic Area / Indication:** A section with a minus sign icon and a title 'Oncology (All)'. It contains a grid of radio buttons and dropdown menus for various therapeutic areas: Allergy/Respiratory, Cardiovascular, Endocrine/Metabolic, Genitourinary/Sexual Health, Infectious Disease, Oncology (selected), Other/Miscellaneous, Autoimmune/Inflammatory, Dermatologic, Gastrointestinal, Hematologic, Neuroscience, Ophthalmic, and Transplantation. All dropdown menus are set to 'All'.
- Mechanism of Action:** A section with a plus sign icon and a title 'All'.
- Technology:** A dropdown menu set to 'All'.
- Partner Status:** A dropdown menu set to 'All'.
- License Status:** A dropdown menu set to 'All'.
- FDA Regulatory Designation:** A dropdown menu set to 'All'.

RESULTS

- Click "Save Graph" to save the graph.
- Click any area on the graph and then click the "List of Projects" tab to get the list of projects behind that section.
- Click "Print List" to print the list of projects.
- Click on a particular project to get an overview of the project, Recap's Interactive Clinical Timeline that tracks a drug's progress, Company Clinical Summary, and the alliances, clinical trials, press releases, regulatory documents, abstracts, and sponsor documents associated with the project.
